Cutting-edge carrying solutions for the modern photographer

“I’ve trusted Manfrotto and its evolution of cutting-edge innovation and designs with every step of my career and it’s never let me down. I’ve worked closely with Manfrotto and its design team and am proud to support and endorse what I believe to be the best and most functional photographic gear/equipment available to the modern-day creator.”

Philip Thurston

Advanced Collection

We're defined by the things we create.

For content creators, it's stories, memories, photographs, and moving pictures. For us, it's the tools that make it all possible.

Through the years, Manfrotto has been relied upon by amateurs and professionals around the world, carried across continents and through daily life, always on-hand when needed most. And our new range of bags is no different.

The entire collection has been reimagined and redesigned to be revolutionary. Sleek, stylish,

resilient, and highly functional, they define the qualities that matter most to us – and you.

Featuring three new and distinctive ranges (PRO Light, Street and Advanced), our new bags have been designed with amateur and professional photographers in mind.

You'll find all the detail you need within the pages of this book, so we'll let the products do most of the talking. 🍷

Designed in Italy

Known the world over for the finer things in life, Italy is synonymous with quality, engineering excellence and sophisticated design.

Put simply, the country itself is unparalleled when it comes to the finer things in life. Of course, you can add Manfrotto to that illustrious list.

All of that Italian style and design innovation is incorporated in the details of our carrying solutions.

Within the pages of this book, you'll see sleek, all-black motifs with a bold splash of red, or an urban forest green within our Street Collection.

What you won't be able to glean is exactly how good it feels to work with a Manfrotto bag.

Behind that beautiful front lies decades of ingenuity. Our wide range of new rolling cases, backpacks, shoulder bags and more are functional to the letter, built with the precise needs of photographers and filmmakers in mind.

We've maximized interior space, while keeping your carry as light and compact as possible. Inside, our new M-Guard™ dividing system works harder than ever to make sure the tools of your trade are safe and organized, exactly as you want them.

Our bags are the complete package, but we're sure you'll discover that for yourself. 🍷

What are you made of?

It's a question that creatives ask themselves all the time. Ingenuity, passion, a drive to deliver – it's all in Manfrotto's DNA. But what about our bags? We'd tell you the answer came easily, but if it had, everyone would have found it.

You'll see variety throughout the pages of this book, as each product in our new range rises to meet different needs. But, between the distinctive and functional polyester of the Advanced bags, within the PRO Light's ripstop mixed-weaved and beyond, there is a common thread: superlative protection.

Our team have worked hard to produce Manfrotto's best interior feature yet. We proudly introduce: the M-Guard™ system.

Constructed with high-density EVA foam, the dividers provide exceptional shock absorption, while maintaining a slim profile, maximizing interior bag space. M-Guard™ offers protection where it's needed most, with softer cushioning, and even more

precise organization options elsewhere. Backed by laboratory testing, we're confident it can handle anything you throw at it.

But what's it all for? Well, that's an easy conclusion.

No image maker wants to expend time and money on broken gear. But, above all else, it's about peace of mind, ensuring the creative process isn't inhibited by doubt or worry.

So, our promise to our users is one of freedom. Tell your visual story where you want, when you want, how you want.

That's what our bags are made of. Now use them to form answers of your own. 📸

M-Guard™

Built to last

To take one view, a camera is a direct means to art, however you choose to make it. To take another, it's simply a tool, and without functioning exactly as it should, it's of no use at all.

This sentiment extends to every piece of kit an image maker owns. And it's with this weight of responsibility that we approach the construction of our bags.

Manfrotto is renowned for its usability and consumer-focus, but when it comes to these products, we've outdone ourselves.

As you explore the new ranges, you'll notice our M-Guard™ system takes pride of place. It's highly protective, but also ensures complete control over the contents of your bag. Every photographer has a unique workflow, which shouldn't be constrained. In this sense, our bag interiors just scratch the surface.

You won't find many of our features elsewhere, so you'd be forgiven for not knowing you've missed them. To name a few, there are multiple access points to help you reach your gear in any position, external points of attachment to keep overall size small and the carry comfortable, and varied means of wearing and adapting your kit – including hidden straps, room for personal effects, and modularity across multiple bags.

Once you've had a chance to experience all this, there may well be no going back.

To take one view, a bag is just a bag. When it's not, it's Manfrotto. 🍷

“With its modular, yet sleek design the PRO Light bag has a plethora of new features that make getting the shot that much easier. With upgrades like separate sleeves for your laptop and gimbal, and more rigid dividers, everything has its place – making this bag one of the most comfortable on the market. It’s my go-to bag for all my future adventures!”

Chandler Borries

PRO Light Collection

PRO Light Collection

For the seasoned and discerning professional, there's less to learn with each passing shoot. But if there's a lesson on efficiency, versatility and style, you'll be educated by the Manfrotto PRO Light range.

The four backpacks are specialized for different photo and video applications, designed to meet the advanced needs of those in the imaging industry. Capacity for sizable tools is a given, but we couldn't stop there.

Picture an innovative divider system for maximum protection, intuitive access points ensuring smooth workflow, hardy protection from damage and the elements, and pleasing comfort throughout. All this in a sleek package that makes a bold statement about exactly what kind of professional you are.

The requirement for even more resilient luggage comes with the territory, but the PRO Light TOUGH range delivers the solution you've been waiting for. We've updated two existing options and added two more hard cases – plus, a selection of new accessories.

Expect the highest standards of dustproofing and waterproofing on the market, virtually indestructible impact resistance, automatic regulation of interior air pressure, and all while remaining lightweight and highly functional.

Protection is everything, but usability is also paramount. On the exterior, you'll find a telescopic handle, multiple lock points, and compatibility with new modular add-ons for quite literally countless uses. Inside, opt for our thoughtfully considered divider system, pre-cubed foam for complete control, or empty space for larger, more durable items.

Flip through the pages that follow and we're certain you'll find the perfect PRO Light bag. They may seem too good to be true, but we'll take it as a compliment. 🍷

PRO Light Collection

PRO Light Backloader Backpack

SKU code:
Small – MB PL2-BP-BL-S
Medium – MB PL2-BP-BL-M

The perfect long-haul bag

Highlights

- Safe, rear-access to camera gear

PRO Light Reloader Tough Tripod Bag

SKU code:
MB PL-RL-TH-TR

For the full set-up

Highlights

- Easily attaches to the front panel of Tough cases through secure metal pins
- Special expandable design to hold different sizes of tripods
- Can also be used as a standalone tripod bag with the included shoulder strap

PRO Light Reloader Tough Laptop Sleeve

The top travel tech accessory

Highlights

- Easily attaches to the front panel of Tough cases through secure metal pins
- Includes laptop and tablet compartments, plus two front pockets for accessories
- Detachable shoulder strap gives the flexibility of using with or without the Tough case

SKU code:
MB PL-RL-TH-LS

PRO Light Collection

PRO Light Reloader Tough Harness System

For added comfort and convenience

Highlights

- Easily attaches to the front panel of Tough cases through four secure metal pins
- Includes a padded adjustable waist belt and sternum strap ensuring maximum comfort

SKU code:
MB PL-RL-TH-HR

Street Collection

Street Collection

The urban jungle is an environment like no other, and any explorer relies on their tools. The considered design of our new Street Collection is multifaceted to ensure all needs are met.

To the untrained eye, these low-profile bags with a stylish forest green coloring may look like a casual carry – and indeed they can be – but with M-Guard™ dividers inserted, they hold the keys to your creativity. From full-frame mirrorless cameras with telephoto zooms, to a host of accessories, and even a pouch for your smartphone, you can have it all.

No kit should inhibit your dynamic process, though. It's what the streets are all about. Whether moving through a crowd at the heart of the action, or slipping through a turnstile en route to the next destination, your camera will be secure and at hand – either on your back, by your side, around your waist, or across your body. With intuitive easy-access points, you'll never miss a moment.

Vlog with pride and document the city life that astounds you. Film, photograph, and do it all with freedom. The next adventure awaits. 📸

- Double-sided removable cables organizer with elastic loops
- Four interior pockets for all your tech essentials

Advanced Collection

Advanced Collection

Between hours of carrying gear, unpredictable weather conditions, and what can amount to miles of travel, there's never been anything easy about long days photographing or filming on the streets. Until now, that is.

The Manfrotto Advanced range builds upon the much-loved Advanced products that came before. While the minimalist, all-black colorway with gray functional details may be the first thing to catch your eye, there's plenty going on below the surface, too.

The old guard has been replaced. New M-Guard™ dividers ensure precious kit is better protected, while retaining the capacity for true malleability in your own unique interior set-up. We know the potential hazards of an urban environment, just as we know how important it is to have creative tools at your fingertips. This line of bags is a no-compromise solution.

Products across the range fulfill a wide variety of needs, so you're sure to find the one that strikes a perfect balance. Intuitive access points, the greatest space and weight efficiency possible, and comfort are all overarching features.

There are six backpacks, four shoulder bags, a 3-way carryall, a messenger satchel, and three holsters to choose from – plus, a rolling bag that's new to our Advanced users. Keep reading to become acquainted with each. 📸

Advanced Active Backpack
