

## VITEC GROUP ANNOUNCES REBRAND TO VIDENDUM PLC and VITEC IMAGING SOLUTIONS CHANGES TO VIDENDUM MEDIA SOLUTIONS

*Cassola, May 24th 2022.* – The Vitec Group plc, a leading global provider of premium branded hardware, products and software solutions to the growing content creation market, **has announced an exciting rebrand and with immediate effect will be known as Videndum plc.**

More than just a name change, **Videndum** encapsulates the Group's growing ambitions and signals a new stage in its evolution.

Building on the structural change and growth in our end markets, and our leading market positions, we are using this opportunity to refresh and reframe our brand. "Videndum" is a Latin noun – which means "***That which must be seen***" or "***A must see***" – and better reflects our purpose and opportunity in the multiple market segments of the growing content creation industry in which we operate.

The Group retains its three-Division structure with each Division also rebranding to the Videndum name:

Vitec Imaging Solutions - **Videndum Media Solutions**

Vitec Production Solutions - **Videndum Production Solutions**

Vitec Creative Solutions - **Videndum Creative Solutions**

### Audio capture

### Motion control & stabilisers

JOBY  
Manfrotto

### Smartphonography

JOBY

### Supports

Avenger  
Gitzo  
JOBY  
Manfrotto

\*Manufactured and distributed under licence

**The rebranding of Videndum Media Solutions** marks a new beginning and reflects recent growth within the Division. Earlier this year, Videndum Media Solutions significantly expanded its capabilities in the audio market, when it acquired the premium microphone brand Audix. The acquisition extended the Division's customer reach in the content creation market, placing the premium Audix brand alongside fellow market leaders – and Videndum Media Solutions brands – JOBY and Rycote. Audix develops products for studio and live applications; JOBY services the fast-growing segment of influencers and vloggers; and Rycote is dedicated to broadcast/production professionals. Audix brings strong R&D capabilities and innovation to the Division's entire microphone range.

The Division is seeing an unprecedented amount of content being produced and shared across digital platforms:

1. **Increased global Internet use** continues to drive demand for high-quality visual content on e-commerce and brand websites. Manfrotto photographic equipment and lighting, and Savage backgrounds offer the perfect solutions for studio, commercial and still product images.
2. On Social Media platforms, over **40 million** people consider themselves to be **Creators**, looking to monetise the delivery of short video content and grow their following. JOBY is the go-to brand for a generation of growth-seeking creators and has expanded its ecosystem to include audio, and digital platforms and products.
3. Video on demand and **subscription TV** channels, such as Netflix and Disney+ have committed to increased expenditure on original content creation, which has led to a higher demand for professional audio and lighting equipment, in particular from Manfrotto and Avenger.
4. Strong growth in the **live video streaming** market, especially with gaming content and corporate applications, is driving demand for JOBY and Manfrotto which offer complete set-ups for home or office studios.

**Videndum Media Solutions** will continue to innovate and commercialise new audio capture products, vlogging accessories and professional equipment for retail e-commerce and mechatronic products, whilst simultaneously expanding its own e-commerce channel. As a value-driven organisation, **social responsibility** remains a guiding principle for the Division. We are strengthening our commitment to **environmental sustainability** which will play a key role in future product development, especially with our Lowepro and Gitzo brands which will further evolve their green strategies.

In a statement, **Videndum Media Solutions CEO Marco Pezzana** summed up the Division's ambitions: *"We are passionate about helping content creators elevate the quality of their portfolios, helping them to stand out in an industry where more audio-visual content is being produced and shared than ever before. As a Company we have evolved from a photography business to a provider of hardware and software solutions, driving a digital transformation to an expanded and diverse creative community that thrives by monetizing high-quality visual content across multiple digital media platforms: 75% of our revenue is now exposed to double-digit growth markets."*
