XPROmonopod+

A collection of flexible and interchangable photo and video products.

The new XPRO Monopod+ family of photo and video monopods brings to the market the innovative FLUIDTECH system Base for smooth footage and the possibility to convert photo monopods in video monopods.

Thanks to the improved fluidity and the superior performance of the leg, the XPRO Monopod+ ensure incredibly smooth footage, ultra-sharp photos and creative shooting perspectives.

The fluid base fits all the monopods, both photo and video.

The new range is composed by 6 photographic models, in different sizes and materials, and 6 video ones, with different sizes, materials and top camera connections.

The FLUIDTECH base is available as a kit with all the new XPRO Monopod+ Video, but also available as an accessory to convert the new XPRO Photo Monopod+ to video monopods.

Fluid Base

Fluidtech: a new level of fluidity and smoothness

This exciting new generation brings image makers the ground-breaking FLUIDTECH, making Manfrotto XPRO Monopod+ the first of its kind in the market featuring 3D fluidity to deliver the ultimate smoothness in an extremely compact solution for advanced video shooting.

When panning is priority, 3D rotation can be blocked leaving pan movement free and giving additional control to the shooting.

FLUIDTECH

** vertical lock does not guarantee full self standing support when camera is mounted

XPROmonopod+
Designed to make the difference.

All the new models are the best option for ease of use and versatility and guarantee superior stability and portability thanks to powerful lightweight aluminium & carbon fibre.
XPRO Monopod+ are 100% Made in Italy, superbly designed and crafted, reliable in the most demanding situations - from weddings, corporate videos, interviews and documentaries to sports events.

High versatility
1/4" – 3/8" thread accommodate either the camera or a specific head.

New Leg Warmer
The new Rubber Leg Warmer increases dramatically the comfort and hand grip.

3D Fluidity
Flexibility to switch from photo to video application thanks to the FLUIDTECH accessory base.

Quick Power Lock
Easy, instant locking and adjustment with the Quick Power Lock system.

The new XPRO Monopod+ Video range is made by six high-performance models all featuring the FLUIDTECH system base. The new range includes the ultra-compact aluminium and carbon fibre versions for the maximum portability. 3 out of 6 models offer different camera connections, i.e. sliding plate system, 2-way fluid head and video head.

The new XPRO Monopod+ Photo range is specially designed
for performance in fields such as sports photography, birdwatching, travel and nature
photography. It comes in six versions, including a high payload version to support
the heaviest equipment and long lenses (up to 10kg/22lb). Adding the FLUIDTECH
base accessory, the photo monopods can also be used for shooting smooth videos.
